PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of experience building scalable web applications. Skilled in Angular, React.js, Node.js, and database management. Experienced in developing chatbot platforms with FAQ automation and LLM-based AI features, CRM integrations, and real-time analytics. Strong expertise in API development, multi-tenant architecture, and intelligent automation systems.

SKILLS & TOOLS

Frontend: Angular, React.js, JavaScript, TypeScript, HTML, CSS, Bootstrap

Backend: Laravel, Node.js, Express.js

Database: MySQL, PostgreSQL

Testing: Angular Jasmine/Karma, Playwright

Tools & Technologies: REST APIs, Webhooks, Git, Cron Jobs

Concepts: MVC Architecture, Multi-Tenant Systems, Role-Based Access Control

Server & Deployment: WHM, Plesk Panel, Git, GitHub, CI/CD, Live Deployment, Domain Setup

PROFESSIONAL EXPERIENCE

Senior Software Developer

Rsoft Technologies Pvt Ltd, Chennai | October 2024 - Present

- Engineered and optimized scalable web applications using Angular and Laravel, improving performance by approximately 30 percent.
- Collaborated in Agile/Scrum teams, working closely with designers, QA engineers, and product managers.
- Built full-stack features including REST APIs, authentication, and backend data flow using Laravel.
- Administered server environments and domain setups, and smooth production deployments.
- Streamlined deployments using Git and CI/CD pipelines, reducing deployment time on Plesk servers.

PROJECTS

Chatbot and Survey Automation Platform

Technologies: Angular, Node.js, Laravel, MySQL

- Built a multi-product platform (Chatbot, Survey, WhatsApp Bot, AI Voice Agent) used across multiple clients use cases.

- Implemented custom buttons with redirection to external platforms such as WhatsApp, YouTube, Telegram, and Instagram.
- Implemented FAQ module to handle predefined questions with instant responses, reducing manual support effort.
- Integrated a Large Language Model (LLM) to generate dynamic, human-like responses for complex user queries.
- Integrated WhatsApp API, email notifications, and webhooks for real-time CRM synchronization.
- Developed a multi-tenant system with role-based access for Super Admin, Admin, and User roles.
- Implemented data masking, subscription control, and response limits for security and scalability.
- Developed an AI Voice Agent with real-time interaction and multi-language support.
- Optimized backend using corn jobs and retry mechanisms for reliable data processing.

CRM (Customer Relationship Management) System

Technologies: React, Node.js, Express.js, MySQL

- Developed a custom CRM system to manage leads, customers, and business workflows.
- Designed a lead management module to capture and assign leads, increasing tracking efficiency.
- Automated workflows for lead assignment and follow-ups
- Built activity tracking and audit logs for user actions and system monitoring.
- Integrated communication modules (Email, WhatsApp) for customer engagement and follow-ups.
- Built a user management system with role-based access for Super Admin, Admin, and Employee roles.
- Ensured data security with validation, masking, and role-based permissions.

EDUCATION

Bachelor of Science in Chemistry

AVC College, Mannampandal, Mayiladuthurai | 2018 - 2020 | 81.23%
